IN THE CLAIMS

The text of all pending claims is set forth below. Cancelled and withdrawn claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented) or (not entered).

Please **AMEND** claims 1, 2, 6, 7, 10, 11, 15, 16, 19, 20, and 24, 25.

1. (CURRENTLY AMENDED) An information processor comprising:
a control information retrieving part retrieving control information that is used to execute a program, wherein said control information comprises:
current address information indicating a current address where the program is stored in a storage device; and
definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information;
a destination defining part defining the destination address information that is indicated by a user and a location different from ~~a current location~~ the current address where the program is stored;
a moving part moving the program ~~in accordance with~~ according to the destination address information indicated by the user, wherein said moving part comprises:
a copying part retrieving the current address information corresponding to said definition name uniquely assigned to the user-indicated destination address information included in said control information in accordance with said definition information and copying all information, which is stored at ~~a current address indicated by the current address information,~~ and comprises the program, additional installed functions information, and optional settings information, in accordance with the destination address information; and
a deleting part deleting all of the information stored at the current address including the program; and
a control information changing part changing the control information based on the destination address information.

Serial No.: 09/488,019

2. (CURRENTLY AMENDED) The information processor as claimed in claim 1, ~~wherein said control information comprises current address information indicating where the program is stored in a storage device, and~~

wherein said control information changing part comprises a replacing part replacing the current address information with the destination address information to which the program is moved.

3. (ORIGINAL) The information processor as claimed in claim 1, wherein said control information is generated when said program is installed into a storage device.

4. (ORIGINAL) The information processor as claimed in claim 1, wherein said control information is referred to when said program is executed.

5. (ORIGINAL) The information processor as claimed in claim 1, wherein said control information is stored in a file referred to by other programs, and the file includes a plurality of control information to execute the other programs.

6. (CURRENTLY AMENDED) The information processor as claimed in claim 1, ~~wherein said control information comprises definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information, and~~

wherein said control information changing part comprises a changing part changing said control information based on said definition information.

Serial No.: 09/488,019

7. (CURRENTLY AMENDED) The information processor as claimed in claim 1, ~~wherein said control information comprises:~~

~~current address information indicating where the program is stored in a storage device;~~
~~definition information including at least one destination address information related to~~
~~the program and including at least one definition name uniquely assigned to the destination~~
~~address information;~~

wherein said control information changing part comprises: comprises a changing part
 changing the current address information included in said control information based on the
 destination address information included in said definition information.

8. (ORIGINAL) The information processor as claimed in claim 1, wherein said
 control information comprises:

program information to execute the program; and
 data information related to data created or edited by executing said program, and

wherein said moving part comprises:

a program moving part moving the program; and
 a data moving part moving the data when the program is moved by said program

moving part.

9. (ORIGINAL) The information processor as claimed in claim 1, further comprising
 an installing part installing said program.

Serial No.: 09/488,019

10. (CURRENTLY AMENDED) A method ~~for~~ processing information comprising: retrieving control information that is used to execute a program, wherein said control information comprises:

- current address information indicating a current address where the program is stored in a storage device; and
- definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information;
- defining the destination address information that is indicated by a user and a location different from ~~a current location~~ the current address where the program is stored;
- moving the program ~~in accordance with~~ according to the destination address information indicated by the user, wherein said moving comprises:
 - retrieving the current address information corresponding to said definition name uniquely assigned to the user-indicated destination address information included in said control information in accordance with said definition information;
 - copying all information, which is stored at ~~a current address indicated by the~~ current address information, and comprises the program, additional installed functions information, and optional settings information, in accordance with the destination address information; and
 - deleting all of the information stored at the current address including the program; and
 - changing the control information based on the destination address information.

11. (CURRENTLY AMENDED) The method as claimed in claim 10, ~~wherein said control information includes current address information indicating where the program is stored in a storage device, and~~

wherein said changing comprises replacing the current address information with the destination address information to which the program is moved.

12. (ORIGINAL) The method as claimed in claim 10, wherein said control information is generated when said program is installed into a storage device.

13. (ORIGINAL) The method as claimed in claim 10, wherein said control information is referred to when said program is executed.

Serial No.: 09/488,019

14. (ORIGINAL) The method as claimed in claim 10, wherein said control information is stored in a file referred to by other programs, and the file includes a plurality of control information to execute the other programs.

15. (CURRENTLY AMENDED) The method as claimed in claim 10, ~~wherein said control information comprises definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information, and~~
wherein said changing comprises changing said control information based on said definition information.

16. (CURRENTLY AMENDED) The method as claimed in claim 10, ~~wherein said control information comprises:~~
~~current address information indicating where the program is stored in a storage device;~~
~~definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information;~~
wherein said changing ~~comprises:~~ comprises changing the current address information included in said control information based on the destination address information included in said definition information.

17. (PREVIOUSLY PRESENTED) The method as claimed in claim 10, wherein said control information comprises program information to execute the program and data information related to data created or edited by executing said program, and
wherein said moving comprises:
moving the program; and
moving the data when the program is moved.

18. (PREVIOUSLY PRESENTED) The method as claimed in claim 10, further comprising installing said program.

Serial No.: 09/488,019

19. (CURRENTLY AMENDED) A computer readable recording medium recorded with a program code for causing a computer to process information, said program code comprising the codes for:

retrieving control information that is used to execute a program, wherein said control information comprises:

current address information indicating a currently address where the program is stored in a storage device; and

definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information;

defining the destination address information that is indicated by a user and a location different from ~~a current location~~ the current address where the program is stored;

moving the program ~~in accordance with~~ according to the destination address information indicated by the user, wherein said code for moving comprises the codes for:

retrieving the current address information corresponding to said definition name uniquely assigned to the user-indicated destination address information included in said control information in accordance with said definition information;

copying all information, which is stored at ~~a current address indicated by the current address information;~~ and comprises the program, additional installed functions information, and optional settings information, in accordance with the destination address information; and

deleting all of the information stored at the current address including the program; and

changing the control information based on the destination address information.

20. (CURRENTLY AMENDED) The computer-readable recording medium as claimed in claim 19, ~~wherein said control information includes current address information indicating where the program is stored in a storage device; and~~

wherein said code for changing comprises code for replacing the current address information with the destination address information to which the program is moved.

21. (ORIGINAL) The computer-readable recording medium as claimed in claim 19, wherein said control information is generated when said program is installed into a storage device.

Serial No.: 09/488,019

22. (ORIGINAL) The computer-readable recording medium as claimed in claim 19, wherein said control information is referred to when said program is executed.

23. (ORIGINAL) The computer-readable recording medium as claimed in claim 19, wherein said control information is stored in a file referred to by other programs and the file includes a plurality of control information to execute the other programs.

24. (CURRENTLY AMENDED) The computer-readable recording medium as claimed in claim 19, ~~wherein said control information comprises definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information, and~~
wherein said code for changing comprises the code for changing said control information based on said definition information.

25. (CURRENTLY AMENDED) The computer-readable recording medium as claimed in claim 19, ~~wherein said control information comprises:~~
~~current address information indicating where the program is stored in a storage device;~~
~~definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information;~~
wherein said code for changing comprises the code for: changing the current address information included in said control information based on the destination address information included in said definition information.

26. (PREVIOUSLY PRESENTED) The computer-readable recording medium as claimed in claim 19, wherein said control information comprises program information to execute the program and data information related to data created or edited by executing said program, and
wherein said code for moving comprises the codes for:
moving the program; and
moving the data when the program is moved.

Serial No.: 09/488,019

27. (ORIGINAL) The computer-readable recording medium as claimed in claim 19, further comprising the code for installing said program.
